Rietumu Asset Management Cash Reserve Fund

Sub-fund Rietumu Asset Management Cash Reserve Fund – USD ISIN: LV0000400877

(hereinafter – the Sub-fund). This Sub-fund is managed by JSC “Rietumu Asset Management” IMF, which is a commercial company of the JSC “Rietumu Banka” group.

Goals and Investment Policy

The Sub-fund provides an opportunity for the Investor to efficiently use free assets for a short term. Its goal is the stable growth of the value of assets, ensuring relatively fast access to the invested funds for the Investor.

The Sub-fund assets are invested in short-term and mid-term financial instruments:

- debt securities and money market instruments issued by credit institutions and companies registered in the world global market commercial countries, debt securities and money market instruments issued by these countries and their municipalities, as well as their central banks;
- deposits in credit institutions of the EU and EEA member states or of the OECD countries included in the Group of Ten;
- investment funds which invest in short-term debt securities and money market instruments.

The Sub-fund can invest over 35% of the Sub-fund assets in debt securities or money market instruments issued or guaranteed by the government of the United States of America.

The investment policy is determined based on the existing political, economic, financial and monetary factors.

To insure against the risk related to fluctuations of the values of the Sub-fund assets, the Fund Manager may perform transactions with derivative financial instruments at the expense of the Sub-fund.

To ensure liquidity, the Sub-fund may perform sale and repurchase (REPO) transactions with the assets.

To increase the Sub-fund incomes, the Sub-fund may perform reverse sale and repurchase (reverse REPO) transactions with the assets. The amount of the received security from such transactions may not be equal to or exceed 30% of the value of the Sub-fund assets.

All incomes obtained during the Sub-fund investment operations, are reinvested in accordance with the Sub-fund investment policy.

The Investor can submit an order about the purchase or subscription of a Sub-fund Certificate every working day from 9:00 till 18:00.

The main currency of the Sub-fund is the US dollar (USD).

The minimum investment amount in the Sub-fund is USD 1 000.00.

The minimum recommended period of holding the investment certificate is up to 1 year.

The operation results of the Sub-fund are not compared with the established market standard.

Risk and Return Profile

The synthetic indicator shows the Sub-fund risk category based on the Sub-fund return fluctuation indices during the previous five years.

To calculate the synthetic indicator for the period when there is no Sub-fund information available, the benchmark return data are used. The benchmark is the Bloomberg USD Investment Grade Composite 1-3 Years Bond Index.

The Sub-fund is included in the first risk category, as the historical year fluctuation of the Sub-fund return data is within the interval of 0.0% to 0.5%. The lower category does not mean that there is no risk. Historical data of the synthetic indicator cannot be a safe performance index in the future. The indicated risk category is not guaranteed and can change in the course of time.

Description of significant risks for the Sub-fund which are not sufficiently included in the synthetic indicator:

Liquidity Risk. The risk that financial instruments available in the Sub-fund investment portfolio cannot be sold or liquidated during the desired period with no significant losses, or no transaction can be performed as a result of which the position is closed, and the risk that in this way the Sub-fund will have restricted fulfilment of the demand for the redemption of investment certificates.

Credit Risk. A possibility of the occurrence of loss in the event counterparty cannot or refuses to perform the obligations to the Sub-fund in accordance with the Agreement terms.

Counterparty Risk. The risk of the Sub-fund suffering loss, in the event the counterparty stops performing its obligations prior to the last payment of the settlement cash flow.

Operational Risk. The risk of the Sub-fund suffering loss due to the influence of inappropriate or incomplete internal processes, human or system activities or external circumstances.

REPO Transaction Risk. The risk that the Sub-fund will suffer loss in the event the counterparty cannot and/or is unable to fulfil its obligations in accordance with the concluded REPO agreement,

as well as if as a result of such an event the Company cannot sell a pledge served for the REPO transaction in the amount required to cover possible losses.
