According to McKinsey recent report on “Manufacturing the future...” – “Manufacturing’s role is changing... manufacturing promotes innovation, productivity, and trade more than growth and employment.” Manufacturing of electronic, optical and precise systems continue to be global technology innovators and businesses are R&D, capital and trade intensive.

We can clearly observe new innovations in various sectors - “telecoms” with 5G, car industry becoming electrically driven and autonomous, medical systems become more sophisticated, networked systems become more M2M as IoT and Industry 4.0.

All those uses require more sophisticated electronic hardware and manufacturers that can deeper participate in R&D processes.
