## **1. REVIEW OF THE COMPANIES GROUP'S POSITION, ACTIVITY AND DEVELOPMENT, CHARACTERISATION OF THE MAIN TYPES OF RISKS AND UNCERTAINTIES, FACED BY THE COMPANY**

Vilniaus Baldai AB is a leading manufacturer of flat-pack furniture. The public company Vilniaus Baldai is the Company that cherishes time-honoured traditions, applies modern technologies and enjoys a stable and continuous business growth.

During the first half of 2020 Vilniaus Baldai revenue stood at EUR 40 million. New glue technology for Asian markets was implemented, as well as automation project of lacquering line was finalised.

The Company focused on quality improvement, processes optimization and equipment utilization improvement with the help of LEAN methodology.

### **Main risks faced by the Group:**

**Economic risk factors.** The sales to the main customer Swedish IKEA constituted approximately 99% of total sales of Vilniaus Baldai AB during 2020 (in 2019 – 99%). Furniture accounted for 99% of the Company's sales during 2020 (in 2019 – 99%), while the rest came from sales of raw materials and waste of raw materials.

Global economy development trends do have an impact on the Company's main customer development pace as well as demand fluctuation for products produced by the Company.

The Company competes with the world furniture producers.

**Political risk factors.** Changing geopolitical situation has an impact on the international trade flows at the same time having an impact on the Company's costs and profitability. There are no requirements and restrictions established by the State to the issuer's activity.

**Social risk factors.** Demographic situation and migration processes have a negative influence on the Lithuanian labour market, therefore, the Company is constantly improving its organisational structure, increasing productivity, allocating resources to improve work conditions, training and competence development. Trade Union, representing interests of the employees, operates actively in the Company.

**Supply.** The Company aims to establish a long-term partnership with reliable suppliers, and at the same time secure alternatives for supply of the main raw materials.

**Technical and technological risk factors.** The Company owns modern production equipment. Vilniaus Baldai AB pays significant attention to the maintenance of production equipment, optimization of technological processes and increase of working efficiency. The physical and moral condition of the main facilities is good and does not cause any risk to the activity of the Company.

**Ecological risk factors.** An environment protection and FSC production management system is introduced in the Company in compliance with the requirements of ISO 9001, ISO 14001 and FCS-STD-40-004 standards. The purpose of this system is to ensure production of high quality products consistent with customer needs, to use FSC certified raw materials, to protect environment, to decrease pollution, usage of resources and to sort waste. There were no manufacturing restrictions because of the environment pollution.

**Repayment of the loans.** The repayment of loans is made according to the contractual schedules. All the payments to the bank are made on time. Information on the terms and conditions of repayment of financial liabilities, credit and interest rate risks of the Group and the Company is provided in the notes to the consolidated and Company's financial statements (Notes 14).

(all amounts are in EUR thousand unless otherwise stated)

**Characteristics of internal control and risk management systems related to the preparation of consolidated financial statement of the Company and the Group.** The compliance with the requirements for the preparation of the set of the consolidated financial statements, internal control and financial risk management systems, legal acts regulating the preparation of the set of the consolidated financial statements is supervised by the Audit Committee established September 16, 2013.

The Audit Committee:

The Company's sales in Lithuania mostly comprise sales of raw materials and waste of raw materials. In 2019 the company changed revenue recognition due to application of IFRS 15.

### Production and sales

Vilniaus Baldai AB designs, produces flat-pack furniture. The production of the Company is produced from wood particle boards, using board on frame technology, which allows to produce lightweight, yet massively looking furniture. When employing this technology less raw materials can be used, and stable quality of the production is attained. Each year new products are developed and production technologies of existing ones are improved taking into consideration the needs of consumers and prevailing tendencies. The planning system implemented in the Company is constantly developed to achieve higher production flexibility and efficiency.

Modern equipment, purchased from such world-renowned manufacturers as Schelling, Burkle, Weeke, Wikoma, Biesse, Biele, Cefla, etc., enables to manufacture different types of the furniture, coated with plywood, pigment or foil.

In abroad	40 250	99.60	37 224	99.70
<b>Total</b>	<b>40 413</b>	<b>100.0</b>	<b>37 335</b>	<b>100.0</b>

### Supply

Vilniaus Baldai AB has introduced an effective system of the purchase of raw materials and services. The Company maintains strategic relations with suppliers and constantly searches for new opportunities in the markets of raw materials and services. The purchase process is distinguished into strategic and operational purchases. The Company aims to manage the supply risk; therefore, main raw materials may be supplied by principal or alternative suppliers. Vilniaus Baldai AB has implemented and continuously improves the assessment system of suppliers; audits of suppliers are carried out.

The Company establishes long-term contracts with its suppliers. The Company acquires the main raw materials from the local, Polish, Slovak and German suppliers. The main suppliers are IKEA Industry Lietuva UAB, IKEA Components S.R.O, IKEA Industry Polska Sp.zo.o, UAB REMMERS BALTICA, Homanit Krosno Odrzanskie SP, Sherwin – Williams Baltics UAB. The local supply of the raw materials is pre-conditioned by the cheap transportation costs and good relations with the major suppliers.

### Employees

The Company pays great attention and allocates funds for the improvement of working conditions and trainings, qualification improvement of the personnel, implementation of LEAN principles and methods. Vilniaus Baldai AB makes regular investments in production facilities, automation of technological processes in order to improve working conditions, reduce physical workload of employees. Investments in occupational safety and wellbeing of employees serve as a basis for establishing a different working environment which encourages to aim for better performance and achieve higher competitiveness in the international markets.

There were 757 employees working in the Group and 693 employees in the Company at the end of the first half of 2020 (730 in the Group and 672 in the Company as of 31 August 2019). The average age of the employees is 41 years.

The average number of the employees in the Company during the first half of 2020:

	2020 I half, ended February 29	2019 I half, ended February 28
Executive personnel	6	6
Specialists	51	55
Workers	625	614
<b>Total</b>	<b>682</b>	<b>675</b>

Remuneration comprises a basic and variable component. A variable component of remuneration depends on the Company's results of operations. The Company is proud of its highly experienced and qualified employees.

(all amounts are in EUR thousand unless otherwise stated)

The average wages of the employees in the period of during the first half 2020:

	2020 I half, ended February 29	2019 I half, ended February 28
Executive personnel	6 238	6 433
Specialists	2 341	2 222
Workers	1 621	1 479
<b>Total</b>	<b>1 725</b>	<b>1 583</b>

The collective agreement is concluded in the Company. The collective agreement was renewed on January 10, 2020. The agreement is mandatory for all the employees of the Company. The purpose of this agreement is to ensure the harmonious work of the staff, high level of working conditions of different categories of employees, salary and other working conditions, also, to ensure additional social guarantees which are not stated according to the regulations of Lithuanian legislation for the employees of the Company. The collective agreement includes the working contract formation, change, termination, work and rest time, payment for the work done, improvement of the qualification of the employees, safety at work and medical assistance, social care, trade union activity and guarantees of the elected employees. If the terms and conditions of the collective agreement are more favourable compared to the working contract, then the collective agreement is followed.

### 3. REFERENCES AND ADDITIONAL EXPLANATIONS ABOUT THE INFORMATION PRESENTED IN THE INTERIM FINANCIAL STATEMENTS

The information presented in the interim condensed consolidated financial statements and the explanatory notes.

### 4. INFORMATION ABOUT THE OWN SHARES

The Company did not have any own shares, did not acquire or transfer any in the reporting period.

### 5. INFORMATION ABOUT THE BRANCHES AND REPRESENTATIVE OFFICES OF THE COMPANY

The Company does not have any branches or representative offices.

### 6. IMPORTANT EVENTS, WHICH HAVE OCCURRED SINCE THE END OF THE LAST FISCAL YEARS

On 29th of November 2019 reorganization by way of merger by acquisition during which to the public limited liability company "Vilniaus baldai", resulting from the reorganisation, was merged a subsidiary thereof – "Trenduva", AB, which ceased to exist without liquidation procedure, was finished.

On the 27th of December 2019 the Annual General Shareholders Meeting of Vilniaus baldai AB adopted the following resolutions:

Agenda item #1: Consolidated annual report.

The Company's consolidated annual report for the FY 2019 ended 31 August 2019.

Agenda item #2: Company's auditor's report.

The report of auditor KPMG Baltics UAB for the FY 2019 ended 31 August 2019 was presented.

Agenda item #3: Approval of the Company's financial statements for the FY 2019 ended 31 August 2019.

Resolution: to approve Company's financial statements for the FY 2019 ended 31 August 2019.

Agenda item #4: Approval of the Company's consolidated financial statements for the FY 2019 ended 31 August 2019.

(all amounts are in EUR thousand unless otherwise stated)

Resolution: to approve Company's consolidated financial statements for the FY 2019 ended 31 August 2019.

Agenda item #5: Approval of the Company's profit distribution.

Resolution: to approve Company's profit distribution (thousand EUR).

Undistributed retained earnings, brought forward	10 544
Net result for the current year	4 165
Profit (loss) not recognized in the income statement of the reporting financial year	90
Distributable result	14 799
Transfers to the obligatory reserves	-
Transfers to other reserves	-
To be paid as dividends	-
To be paid as annual payments (bonus) to the Board members	-
Undistributed retained earnings, carried forward	14 799

Since the end of the reporting fiscal year till the interim condensed consolidated financial statement confirmation there was an important event - the coronavirus (COVID-19) pandemic, that has been announced throughout the world, and the strict measures to stop it.

With many countries around the world deciding to close a large number of stores, our main client's stores are closing as well, leading to a reduction in order volumes. As the company has accumulated sufficient stock of products in the production warehouse to fully meet the customer's needs in the short-term, AB Vilniaus baldai decided to gradually stop production from this year's March 20<sup>th</sup>. When the stock balance drops to the minimum amount set by the customer, the company will resume production.

Due to the prevailing uncertainty, it is currently not possible to assess the impact of the current situation on the company's annual financial results.

## 7. OPERATING PLANS AND FORECASTS OF THE GROUP'S ACTIVITY

During the next financial year, the product range of the Company will partially change (new products will be implemented and some of the current products will be renewed), several production automation projects are planned.

As well as in previous years the Company will specifically focus on productivity, improvement of internal processes and quality, production of new products.

In FY 2018 Vilniaus Baldai AB and IKEA AG have signed a long-term contract, according to which the company plans to increase its turnover and production capacity. To fulfil the contractual obligations and prepare for further sustainable growth, Vilniaus Baldai AB plans to invest into land plots of 18.5 ha in Trakai region, Guopstai, new production and warehousing facilities, equipment, technologies and development of the production base. Planned investments should comprise EUR 53 million and would be completed within the next 3 years. These investments will allow the company to significantly reduce direct and indirect costs, while ensuring sustainable cost of the products. Part of the existing production lines is also planned to be transferred to a new factory.

(all amounts are in EUR thousand unless otherwise stated)

## 8. INFORMATION ABOUT THE RESEARCH AND DEVELOPMENT ACTIVITY OF THE COMPANY

The Group did not carry out any research or development activity. The Company used the results of the customers' research.

## 9. WHEN THE GROUP EMPLOYS THE FINANCIAL INSTRUMENTS AND WHEN IT IS IMPORTANT FOR VALUATION OF THE COMPANY'S ASSETS, EQUITY, LIABILITIES, FINANCIAL POSITION AND ACTIVITY RESULTS OF THE COMPANY, THE COMPANY DISCLOSES THE OBJECTIVES OF THE FINANCIAL RISK MANAGEMENT, ITS POLICY FOR HEDGING MAJOR TYPES OF FORECASTED TRANSACTIONS FOR WHICH HEDGE ACCOUNTING IS USED, AND COMPANY'S EXPOSURE TO PRICE RISK, CREDIT RISK, LIQUIDITY RISK AND CASH FLOW RISK

The Group did not use any financial instruments, which are important for the evaluation of the company's assets, liabilities and operation results.

## 10. INFORMATION ON THE CONTRACTS WITH THE INTERMEDIARIES OF THE PUBLIC TURNOVER OF THE SECURITIES

The Company has signed the contract with the Siauliu bankas AB (Seimyniskiu Str. 1A, Vilnius) on the management of the Company's securities accounting and the payment of dividends to the shareholders.

## 11. STRUCTURE OF THE ISSUER'S AUTHORIZED CAPITAL

## **5. EXPLANATORY NOTES**

### **1 SUMMARY OF THE BASIC ACCOUNTING PRINCIPLES AND PRACTICES**

Vilniaus Baldai AB (hereinafter “the Company”) is a public limited liability company registered in the Republic of Lithuania. The address of its registered office is Savanoriu Ave. 178B, Vilnius, LT-03154, Lithuania.

The Company is engaged in furniture production and trade. The Company was registered on 9 February 1993; its shares are traded in the Secondary List of the NASDAQ OMX Vilnius AB.

As of February 29, 2020 the Group employed 757 people, the Company employed 693 people (on August 31, 2019 the Group employed 730 employees, the Company – 672).

#### **Main accounting policies**

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (hereinafter the EU). The financial statements have been prepared based on acquisition cost principle.

#### **Basis for drawing up of the interim condensed consolidated statement**

The interim condensed consolidated financial statements for the six months of FY2020 ended February 29, 2020 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's and the Company's annual financial statements as for of FY2020.

In the financial statements all figures are provided in EUR thousand. The statements are drawn up applying the method of historical costs.

When drawing up the financial statements in accordance with the IFRS, the managers are required to make calculations and estimations to support the assumptions that have an impact on application of the accounting principles and on the amounts of assets and liabilities, income and costs. The calculations and related assumptions are based on historical experience and other factors that correspond to the present situation and on the basis of which conclusions concerning the carrying amount of assets and liabilities are made that cannot be decided on the basis of other sources. The actual amounts may differ from these assumptions.

The Group's and the Company's accounting policies are consistent with those used in the previous years.

#### **Functional and presentation currency**

Starting from 1 January 2015 the Company's Financial statements currency is EURO.

The Company's accounting data nominated in Litas prior to Euro adoption in Lithuania (as of December 31, 2014) are converted from Litas to Euro at the Official Exchange rate 1 EUR = 3,45280 LTL.

#### **Financial year**

On 8 October 2014 the Extraordinary General Shareholders Meeting of Vilniaus Baldai AB has resolved to change the financial year, which earlier started 1 January and ended 31 December, to the financial year beginning on 1 September and ending on 31 August of the next year in order to coordinate the period of financial year of Vilniaus Baldai AB and its main customer.

(all amounts are in EUR thousand unless otherwise stated)

### **Principles of consolidation**

The consolidated financial statements of the Group include Vilniaus Baldai AB and its subsidiary. The control is normally evidenced when the Group owns, either directly or indirectly, more than 50 percent of the voting rights of a company's share capital and/or is able to govern the financial and operating policies of an enterprise so as to benefit from its activities.

Subsidiaries are consolidated from the date from which effective control is transferred to the Company and cease to be consolidated from the date on which control is transferred out of the Company. All intercompany transactions, balances and unrealized gains and losses on transactions among the Group companies have been eliminated.

Consolidated financial statements are prepared on the basis of the same accounting principles applied to similar transactions and other events under similar circumstances. Financial statements of Subsidiary were prepared for the same period as that of the Company.

### **Intangible assets**

Intangible assets are measured initially at cost. Intangible assets are recognized if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Intangible assets are amortized on a straight-line basis over the best estimate of their useful lives.

#### Software

The costs of acquisition of new software are capitalized and treated as an intangible asset if these costs are not an integral part of the related hardware. Software is amortized over a period not exceeding 3 years.

Costs incurred in order to restore or maintain the future economic benefits that the Group and the Company expects from the originally assessed standard of performance of existing software systems are recognized as an expense when the restoration or maintenance work is carried out.

### **Property, plant and equipment**

Property, plant and equipment is stated at cost less accumulated depreciation and impairment losses.

When assets are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in the statement of comprehensive income.

The initial cost of property, plant and equipment comprises its purchase price, including non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operation, such as repair and maintenance costs, are normally charged to the statement of comprehensive income in the period the costs are incurred.

Depreciation is computed on a straight-line basis over the following estimated useful lives:

Buildings	10 - 66 years
Machinery and equipment	6 - 20 years
Vehicles	5 - 10 years
Other property, plant and equipment	2 - 6 years.

The assets' residual values and useful lives are reviewed periodically to ensure that the period of depreciation is consistent with the expected pattern of economic benefits from items in property, plant and equipment.

(all amounts are in EUR thousand unless otherwise stated)

Construction-in-progress is stated at cost. This includes the cost of construction, plant and equipment and other directly attributable costs. Construction-in-progress is not depreciated until the relevant assets are completed and available for use.

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalized as part of the costs of those assets.

Capitalization of borrowing costs continues up to the date when the assets are substantially ready for their use or sale.

The Group capitalizes borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalized are calculated at the group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalized.

Spare parts are classified as property, plant and equipment if they meet the definition, including the requirement to be used over more than one period. Otherwise, they are classified as inventory. For spare parts that are kept to ensure smooth operation of some machinery without interruptions, the depreciation period starts immediately when those spare parts are acquired.

#### **Financial instruments - assets**

Financial assets are classified as either financial assets at fair value through profit or loss, held –to -maturity investments, loans and receivables, and available – for - sale financial assets, as appropriate. The Company determines the classification of its financial assets based on its nature and purpose at initial recognition.

Financial assets are recognized on a trade date basis where the purchase or sale process is under a contract, which terms require delivery of the financial assets within the timeframe established by the market concerned. Financial assets are recognized initially at fair value, plus, in the case of investments are not carried at fair value through profit or loss, directly attributable transaction costs.

The Group's/ Company's financial assets include cash, time deposits, trade receivables and other receivables and loans.

The subsequent measurement of financial assets depends on their classification as follows:

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortized cost using the effective interest method. Gains or losses are recognized in the statement of comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process. Receivables are initially recorded at the fair value of the consideration given. Current receivables are subsequently carried at cost less impairment, and non-current receivables and loans granted - at amortized cost, less impairment.

Loans and receivables are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets.

#### Effective interest rate method

Effective interest rate method is used to calculate amortized cost of financial assets and allocate interest income over the relevant period. The effective interest rate exactly discounts estimated future cash flows through the expected life of the financial asset.

(all amounts are in EUR thousand unless otherwise stated)

#### Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group/ Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass through” arrangement; or
- the Group/ Company has transferred their rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

#### **Investments into subsidiaries**

Investments in subsidiaries and associated companies are accounted at cost in the Company's separate financial statements. Cost of investment is decreased by impairment losses. An assessment of recoverable amount of investment is performed for each investment individually.

Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than the carrying amount in the Company's statements of financial position, an impairment loss is recognized.

#### **Inventories**

Inventories are initially recorded at acquisition cost. Subsequent to initial recognition, inventories are valued at the lower of cost or net realizable value, after impairment evaluation for obsolete and slow - moving items. Net realizable value is the selling price in the ordinary course of business, less the costs of completion and applicable variable marketing and distribution costs. Cost is determined by the first-in, first-out (FIFO) method. The cost of finished goods and work in progress includes the applicable allocation of fixed and variable overhead costs based on a normal operating capacity. Unrealizable inventory is fully written-off.

#### **Trade receivables**

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non - current assets.

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Short term trade receivables are not discounted.

#### **Cash and cash equivalents**

Cash includes cash on hand and cash with banks and bank overdrafts. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, time deposits held at call with banks with original maturities of 3 months or less and other short-term highly liquid investments.

#### **Share capital**

Ordinary shares are classified as equity. Ordinary shares are stated at their par value.

#### **Dividends distribution**

Dividend distribution to the company's shareholders is recognized as a liability in the group's financial statements in the period in which the dividends are approved by the company's shareholders. Dividends paid are classified as financing cash flows in the statement of cash flows.

(all amounts are in EUR thousand unless otherwise stated)

### **Borrowings**

Borrowing costs are expensed as incurred, unless they are directly attributable to acquisition, construction or production of a qualifying asset.

Borrowings are initially recognized at fair value of proceeds received, less the costs of transaction. They are subsequently carried at amortized cost, the difference between net proceeds and redemption value being recognized in the net profit or loss over the period of the borrowings using the effective interest method.

Interest paid is classified as financing activities cash flows in the statement of cash flows.

### **Leases**

*The Company and the Group are the lessees*

#### *(a) Finance lease*

Leases of property, plant and equipment where the Company and the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the estimated present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant interest rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in long-term payables except for installments due within 12 months which are included in current liabilities.

The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term.

#### *(b) Operating lease*

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the statement of comprehensive income on a straight-line basis over the period of the lease.

*The Company and the Group are the lessors*

#### *(c) Operating lease*

Payments received under operating leases (net of any incentives given to the lessee) are credited to the statement of comprehensive income on a straight-line basis over the period of the lease.

### **Grants**

Grants are registered in accounting when they are actually received. Grants related to the tangible assets are recognized in amounts equal to depreciation of respective tangible assets. If Grant is received for tangible assets acquisition, it is not recognized until tangible assets are started to depreciate. Grants for expenses reimbursement are recognized in amounts of incurred expenses. Unused grants are disclosed in the Statement of Financial position under Grants and subsidies

### **Trade payables**

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

(all amounts are in EUR thousand unless otherwise stated)

## **Employee benefits**

### *(a) Social security contributions*

The Company and the Group pay social security contributions to the state Social Security Fund (the Fund) on behalf of its employees based on the defined contribution plan in accordance with the local legal requirements. A defined contribution is a plan under which the Company/ Group pays fixed contributions into the Fund and will have no legal or constructive obligations to pay further contributions if the Fund does not hold sufficient assets to pay all employees benefits relating to employee service in the current and prior period. Social security contributions are recognized as expenses on an accrual basis and are included in payroll expenses.

### *(b) Termination benefits*

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group or the Company recognizes termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

### *(c) Bonus plans*

The Company recognizes a liability and an expense for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

### *(d) Provisions for pensions and jubilee payments*

According to the terms of the collective agreement effective at the Company, each employee is entitled to a jubilee payment and 2–3 months' salary payment when retiring after reaching the pension age. Actuarial calculations are made to determine liability for such payments. The liability is recognized at present value discounted using market interest rate.

The Company recognizes re-evaluations of the pension benefit obligation in 'Other comprehensive income that will not be reclassified to profit or losses, while service cost and net interest in recognized within profit or loss. The Company within profit or loss accounts for jubilee benefits and long-service benefits.

## **Provisions**

Provisions are recognized when the Group and the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The provisions are reviewed at each statement of financial position date and adjusted in order to present the most reasonable current estimate. If the effect of the time value of money is material, the amount of provision is equal to the present value of the expenses, which are expected to be incurred to settle the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

## **Income tax**

Income tax charge is based on profit for the year and considers deferred taxation. Income tax is calculated based on the Lithuanian tax legislation.

The income tax rate in Lithuania was 15 % in 2020 (15 % in 2019).

Starting from 2014 tax losses, except for losses due to sale of securities and (or) derivatives (of nonfinancial institutions), may be carried forward for an unlimited period of time, however carrying forward is stopped, if the company stops its activities due to such losses, except when the company stops its activities due to reasons beyond its control. Deductible tax losses carried forward may not exceed 70 percent of the taxpayer's taxation period income, calculated as income net of tax-exempt

(all amounts are in EUR thousand unless otherwise stated)

income, regular deductions, deductions of limited amounts, with the exception of the previous year losses.

Losses due to sale of securities and (or) derivatives (of non-financial institutions) are carried forward no more than five consecutive tax periods starting from the tax period following the tax period during which the loss was incurred. While deducting previous years' sale of securities losses from current year's securities sales income restriction (of up to 70 percent sale of securities income) does not apply.

Deferred taxes are calculated using the statement of financial position liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse based on tax rates enacted or substantially enacted at the statement of financial position date.

Deferred tax asset has been recognized in statement of financial position to the extent the management believes it will be realized in the foreseeable future, based on taxable profit forecasts. If it is believed that part of the deferred tax asset is not going to be realized, this part of the deferred tax asset is not recognized in the financial statements.

Investment tax credit, that arises from tax benefit amount carried forward, qualifies for the initial recognition exception. Therefore, no deferred tax asset is recognized at the time the tax credit arises, but recognition occurs as a reduction of current tax as the credit is realized.

Deferred tax assets and liabilities are offset when they are related to profit taxes levied by the same tax authority and when there is a legally enforceable right to set off current tax assets against current tax liabilities.

#### Income tax and deferred tax for the accounting period

Income tax and deferred income tax are charged or credited to profit or loss, except when they relate to items included directly to equity, in which case the deferred income tax is also accounted for in equity.

#### **Revenue recognition**

As of 1 September 2018 revenues of the Group and the Company are recognized in accordance with IFRS 15, that is, the Group and the Company recognize revenue at such time and to such an extent that the transfer of goods or services to customers represents the consideration that the Group and the Company expect to receive in exchange for those goods or services. In applying this Standard, the Company takes into account the terms of the contract and all relevant facts and circumstances.

The Company's revenue is recognized using the 5-step model:

##### *Step 1 - Identify customer agreements.*

A contract recognizes an agreement between two or more parties (subject to purchase / sale terms) that creates enforceable rights and enforceable obligations (not applicable if a joint venture agreement is signed). A contract is within the scope of IFRS 15 if all of the following criteria are met:

- the parties have approved the contract (in writing, orally or in accordance with any other normal commercial practice) and are bound by their obligations under the contract,
- it is possible to identify the rights of each party with regard to the goods and / or services to be transferred,
- it is possible to identify the payment terms for the goods and / or services to be transferred,
- the contract has commercial substance,
- it is probable that the consideration to which the Group and the Company are entitled to in exchange for the goods or services will be collected.

(all amounts are in EUR thousand unless otherwise stated)

Contracts with the customer may be aggregated or disaggregated into several contracts, while retaining the criteria of former contracts. Such aggregation or disaggregation is considered modification of the contract.

*Step 2 - Identify performance obligations in the contract.*

Contractual commitment to deliver goods and / or services to a customer. If separate goods and/or services are identifiable, the liabilities are recognized separately. Each liability is identified in one of two ways:

- a good and / or service is distinct, or
- a set of individual goods and / or services that are substantially the same and have the same pattern of transfer to the customer.

*Step 3 - Determine the transaction price.*

Under the new IFRS 15, the transaction price may be fixed, variable, or both.

The transactions concluded by the Company apply fixed prices for both continuous services and services performed at a certain point in time. The transaction price is also adjusted considering the time value of money, if the contract includes a significant financing arrangement, and considering any consideration payable to the customer and non-cash consideration received, if any. The Group and the Company apply the following sales price calculation methods: adjusted market assessment approach, expected cost plus margin approach and residual approach. Similar transactions are measured equally.

*Step 4 - Allocate the transaction price to each performance obligation.*

A performance obligation is a contractual promise to deliver to the customer a separate good or service, or a set of individual goods or services that are substantially the same and have the same pattern of transfer to the customer. The transaction price is apportioned between each performance obligation based on the relative separate selling prices of the good or service promised in the contract. If the contracts do not specify separately the price of the service or good (for example, one price for two products), the Company shall determine it. In measuring the transaction price, the Company estimates a discount or variable amount of consideration that relates only to a particular portion of the contract.

*Step 5 - Recognise revenue when (or as) the Group and the Company satisfy a performance obligation.*

The Group and the Company recognize revenue when they satisfy a performance obligation by transferring promised goods or services to the customer (i.e. when the customer obtains control of the mentioned goods or services). The recognized amount of revenue is equal to the amount of satisfied performance obligation. Performance obligation may be satisfied at a point of time or over time. A period of time is recognised as a calendar month.

The recognition of revenue depends on whether the obligation is satisfied over a period of time (continuous) or at a point in time. In any event, the transfer of control shall be taken into account.

Revenue is recognized at the fair value of the consideration received or receivable. Revenue is reduced by the estimated amount of customer returns, discounts, and other similar provisions. Revenue is recognized when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably. Revenue from sales is recognized net of VAT and discounts, including any cumulative expected discounts for the current year.

The Group's and the Company's revenue types:

1. Revenue from sale of furniture
2. Revenue from sale of raw materials and waste

Revenue from sales of furniture and revenue from the sale of raw materials are recognized at a point of time in the statement of profit and loss and other comprehensive income.

(all amounts are in EUR thousand unless otherwise stated)

### **Expense recognition**

Expenses are recognized on the basis of accrual and revenue and expense matching principles in the reporting period when the income related to these expenses was earned, irrespective of the time the money was spent. In those cases when the costs incurred cannot be directly attributed to the specific income and they will not bring income during the future periods, they are expensed as incurred.

The amount of expenses is usually accounted for as the amount paid or due, excluding VAT. In the cases when a long period of payment is established and the interest is not distinguished, the amount of expenses shall be estimated by discounting the amount of payment using the market interest rate.

### **Foreign currencies**

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies on the statement of financial position date are recognized in the statement of comprehensive income. Such balances are translated at period-end exchange rates.

### **Factoring**

A factoring transaction is a financing transaction in which the factoring company finances the Company by purchasing debt obligations from it. By this transaction, the Company transfers to the Factor the right to its receivables under the invoices due, which are due in the future. Factoring can be with recourse (the factoring agent has the right to repay the debt obligations to the Company) and without the right of recourse (the factoring agent has no right to repay the debt obligations to the Company). Receivables transfer (factoring without recourse, it means, the buyer of the debt has no right to cancel the transaction) is treated as a sale of debts and is written off immediately if the Company transfers all risks associated with the debt transfer and no debt repurchase is contemplated, there is no provision for a debt buyer to foreclose on this transaction.

2020FY factoring contract is without the right of recourse (the factoring agent has no right to cancel the transaction), for this reason, the trade receivables are reduced after the receipt of the factoring advance payment. In the statements of cash flows factoring is included in the cash flows from financing activities.

### **Impairment of assets**

#### Non-financial assets

Non-financial assets, other than inventories and deferred tax are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication exists, the asset's recoverable amount is estimated.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in profit or loss.

Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. Reversal is accounted for in the same caption in profit or loss as impairment losses. For evaluation of impairment of assets, the entire Group is considered as one cash generating unit.

#### Impairment of financial assets (effective until 31 August 2018)

Financial assets are reviewed for impairment at each statement of financial position date.

(all amounts are in EUR thousand unless otherwise stated)

For financial assets carried at amortized cost, whenever it is probable that the Group and the Company will not collect all amounts due according to the contractual terms of loans or receivables, an impairment or bad debt loss is recognized in profit or loss. Impairment of trade and other receivables is established when there is objective evidence (such as probability of default or significant financial difficulties of the client) that the Group and the Company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired.

The recoverable amount of receivables carried at amortised cost is measured as the present value of future cash flows discounted at the original interest rate (i.e. the effective interest rate calculated at the initial recognition of these receivables).

The reversal of impairment losses previously recognized is recorded when the decrease in impairment loss can be justified by an event occurring after the write-down. Such reversal is recorded in profit or loss under the same caption as impairment losses. However, the increased carrying amount is only recognized to the extent it does not exceed the amortized cost that would have been had the impairment not been recognized.

#### Impairment of financial assets (effective as of 1 September 2018)

Impairment losses on financial assets measured at amortized cost are measured using the expected credit loss (ECL) model. Credit losses are measured at the present value of all cash losses (the difference between the cash flows that the Group and the Company hold under the contract and the cash flows the Group and the Company expect to receive). ECLs are discounted applying an effective interest rate.

At the end of each reporting period, the Company and the Group recalculate and record the allowance for expected credit losses, taking into account past events, current market conditions and future prospects. At the end of each financial period, the Group and the Company assess whether there has been a material change in the credit risk of the financial instrument since initial recognition.

At the end of each reporting period, the Group and the Company assess whether financial assets carried at amortized cost are impaired. A financial asset is impaired when one or more events have occurred that have a negative impact on the estimated future cash flows of the financial asset. The following criteria are used by the Company to determine whether there is objective evidence that an impairment loss has been incurred:

- the counterparty experiences financial difficulties as evidenced by its financial information;
- in the event of a breach of contract, such as a default or payment delay more than 90 days;
- the counterparty is considering bankruptcy or financial reorganization;
- there is an adverse change in the payment status of the counterparty's as a result of changes in national or local economic conditions affecting the counterparty; or
- the value of collateral, if any, significantly decreases as a result of deteriorating market conditions.

Losses on financial assets measured at amortized cost are deducted from the gross value of such assets.

The gross carrying amount of a financial asset is written off when the Group and the Company have no reasonable expectation of recovering all or part of the asset. Non-recoverable assets are written off against recognized related impairment loss allowance, provided that all necessary steps have been taken to recover the asset and the amount of the loss has been determined. The amounts previously written off and recovered in subsequent periods are credited to the impairment loss account within the statement of profit or loss and other comprehensive income.

(all amounts are in EUR thousand unless otherwise stated)

### **Segment information**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of directors that makes strategic decisions.

### **Related parties**

Related parties are defined as shareholders, employees, members of the Board, their close relatives and companies that directly or indirectly (through the intermediary) control or are controlled by, or are under common control with, the Group and the Company, provided the listed relationship empowers one of the parties to exercise the control or significant influence over the other party in making financial and operating decisions.

### **Contingencies**

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is not recognized in the financial statements but disclosed when an inflow or economic benefits is probable.

### **Subsequent events**

Post-statement of financial position events that provide additional information about the Group's and the Company's position at the statement of financial position date (adjusting events) are reflected in the financial statements. Post-statement of financial position events that are not adjusting events are disclosed in the notes when material.

### **Offsetting and comparative figures**

When preparing the financial statements, revenue and expenses are not set off, except the cases when certain IFRS specifically require such set-off. Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

### **Use of estimates in the preparation of financial statements**

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingencies, at the reporting date and within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

#### Estimates and assumptions

The main areas where management is required to make significant and critical judgements and areas where estimates and assumptions might have significant impact for the preparation of financial statements are described below:

#### *Property, plant and equipment – useful life*

The key assumptions concerning determination the useful life of property, plant and equipment are as follows: expected usage term of the asset, expected technical or commercial obsolescence arising from changes or improvements in the production on legal or similar limits on the use of the asset, such as the expiry dates of related leases.

(all amounts are in EUR thousand unless otherwise stated)

#### *Tax liabilities*

The tax authorities have a right to examine the Company's books and accounting records at anytime during the 5 years' period after the current tax year and account for additional taxes and fines. In the opinion of the Company's management currently there are no circumstances which would raise substantial liability in this respect.

#### *Related party transactions*

In the normal course of business the Company enters into transactions with its related parties. These transactions are priced predominantly at market rates. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties.

#### *Pension and jubilee benefits*

Key assumptions used in determining the provision for pension and jubilee benefits are as follows: employee turnover rate by age group, discount rate, and wage and salary growth. The Company's management makes judgments in relation to these assumptions.

#### *Revenue recognition*

The management assesses the moment of revenue recognition, i.e. whether revenue is recognized over time or at a point of time. The management assessed that customer do not simultaneously receive and consume the benefits provided by the Company's performance as the Company performs, the Company's performance does not create or enhance an asset that the customer controls as the asset is created or enhanced, the Company's performance create an asset with an alternative use to the Company and the Company do not has an enforceable right to payment for performance completed to date. Based on this assessment management decided that revenues should be recognised at a point in time. Also, the management estimates expected returns.

The management assesses if the sale of raw materials meets revenue recognition criteria according IFRS 15. The Company provides raw materials to several external and related parties in order to obtain service from these parties- production of component parts used in the further production of furniture. The management has analysed such contracts based on the requirements of IFRS 15 and determined, that in most of cases there is no actual sale of raw materials and acquisition of components but transaction is rather a purchase of production service. Vilniaus baldai, AB controls the process and has full responsibility for the final customer. Raw materials were sold at purchase price to the production service provider.

#### *Classification of spare part*

The management makes judgement if spare parts meet the definition of property, plant and equipment. The basis of judgement is determining if spare part is kept to ensure smooth operation of some machinery without interruptions or it not.

#### *Expected credit losses estimation*

The management measures expected credit losses (ECL) and estimates allowance for trade receivables and contract assets. Key assumption is determining the weighted-average loss rate.

(all amounts are in EUR thousand unless otherwise stated)

## 2 SEGMENT REPORTING

Management of the Company has determined the business segments based on the reports reviewed by the board of directors that are used to make strategic decisions. Consequently it was decided that the Company has only one business segment – furniture production and trade.

Breakdown of revenue by the sales markets is as follows

	Sales	
	FY2020 I half, ended February 29	FY2019 I half, ended February 28
European Union countries	24 658	21 408
Other than European Union countries	15 592	15 816
Lithuania	163	111
	<b>40 413</b>	<b>37 335</b>

## 3 DISTRIBUTION COSTS

	FY2020 I half, ended February 29	FY 2019 I half, ended February 28
Transportation and storage costs	501	610
Remuneration and social insurance	-	-
Depreciation and amortization	38	6
Other	55	65
	<b>594</b>	<b>681</b>

## 4 ADMINISTRATIVE COSTS

	FY2020 I half, ended February 29	FY2019 I half, ended February 28
Remuneration and social insurance	1 056	1 054
Depreciation and amortization	252	38
Operation taxes expenses	88	106
Employee training and consultation	61	23
Insurance	26	22
Business trips	45	34
Waste utilization expenses	26	40
Utilities and communication	24	23
Bank services	79	2
Other	535	472
	<b>2 192</b>	<b>1 814</b>

(all amounts are in EUR thousand unless otherwise stated)

#### 5 OTHER OPERATING INCOME, NET

	FY2020 I half, ended February 29	FY2019 I half, ended February 28
Rent income	37	44
Other income and costs	120	245

### **Financial results of activities**

The Group Revenue stood at 21 348 thousand EUR during September – November of 2019. Net profit of the Group during September – November of 2019 was 1 562 thousand EUR, while EBITDA was 2 407 thousand EUR.

The Group Revenue stood at 19 065 thousand EUR during December of 2019 – February of 2020. Net profit of the Group during December of 2019 – February of 2020 was 775 thousand EUR, while EBITDA was 1 607 thousand EUR.

The Group Revenue stood at 40 413 thousand EUR during September of 2019 – February of 2020. Net profit of the Group during September of 2019 – February of 2020 was 2 337 thousand EUR, while EBITDA was 4 014 thousand EUR.

Since the end of the reporting fiscal year till the interim condensed consolidated financial statement confirmation there was an important event - the coronavirus (COVID-19) pandemic, that has been announced throughout the world, and the strict measures to stop it.

With many countries around the world deciding to close a large number of stores, our main client's stores are closing as well, leading to a reduction in order volumes. As the company has accumulated sufficient stock of products in the production warehouse to fully meet the customer's needs in the short-term, AB Vilniaus baldai decided to gradually stop production from this year's March 20<sup>th</sup>. When the stock balance drops to the minimum amount set by the customer, the company will resume production.

Due to the prevailing uncertainty, it is currently not possible to assess the impact of the current situation on the company's annual financial results.
