2. Risk Factors

2.1. Important note

The risks indicated in this section may reduce Issuer's ability to fulfil its obligations and cause its insolvency in the worst-case scenario.

Notes are secured with Collaterals established in accordance with the Collateral Agreements executed between the Collateral Providers and the Collateral Agent.

This section may not feature all the potential risks, which may affect the Issuer.

2.2. Changes in regulatory enactments and policies

The Issuer carries out its production activity in Latvia, Estonia and Lithuania and most of the risks, which affect it, are related to the general economic situation in all three Baltic countries and regulatory enactments adopted by each country.

The Issuer is headquartered in Latvia and has manufacturing plants in Latvia, Lithuania and Estonia via local subsidiaries, thus every subsidiary operates under the laws of the respective country and any significant changes in existing regulatory enactments or implementation of new regulations governing corporate taxation, employees' remuneration, natural resources taxation and others might negatively affect the business and solvency of the particular subsidiary and Sakret Group as a whole.

2.3. Macroeconomics risk

The Issuer is engaged in production of high-end quality dry and read-made liquid construction mixtures and construction chemicals in Latvia, Lithuania and Estonia.

In 2018, 39% of the Sakret Group revenue was generated by building material sales in Latvia, 29% in Lithuania and 25% in Estonia. Remaining was generated by sales of services. The economic situation in all Baltic countries are assessed as stable which is supported by both macroeconomic data, such as GDP and employment indicators. Latvia and Lithuania currently have an A credit rating assigned by Standard & Poor's with a stable outlooks. Estonia currently has an AA- credit rating assigned by Standard & Poor's with a stable outlook.

Financial results of Sakret Group depends on the stable macroeconomic situation in each of the Baltic countries.

2.4. Construction industry risk

The demand for dry and read-made liquid construction mixtures that Sakret Group produces is directly linked to the state of construction industry in Baltic countries.

Following a rapid growth over the period of 2003 – 2008, the construction industry in the Baltics went into a nose-dive, with 2010 falling back to the level of 2002. Further years brought approximately 75% of cumulative growth until the industry faced another fall in 2016.

Latvia is expected to face the most substantial growth of all three Baltic countries over the next couple of years, evening out at a GDP growth of approx. 4%. Real estate prices have been increasing in line with domestic income and the current low interest environment expand consumer capabilities in housing investments. In Estonia, construction confidence index has currently reached its post-crisis-high level, expecting further sector growth.

Despite positive outlook on construction sector in Baltic countries, the decline of activity in the industry may adversely affect the Sakret Group's business and financial condition.

2.5. Competition risk

Sakret Group direct competitors across all Baltic countries are "Knauf", "Ceresit", "Saint-Gobain", and "Baumit". All Sakret's direct competitors are international companies and have one or more factories in Latvia, Lithuania and Estonia. In contrast to its competitors, Sakret Group is working exclusively for the Baltic market and is headquartered in the Baltics.

The Issuer may have difficulties to compete with these competitors, thus to remain competitive and to protect profit margins, Issuer must offer new products that keep pace with industrial and technological developments and must respond to customer requirements on a timely basis. New technologies, changing commercial

circumstances (for example, consolidation within a relevant sector), existing competitors (including those with a longer operating history, greater resources and/or broader range of products) and new entrants to the markets in which Issuer currently operates or markets in which Sakret Group might target for expansion may adversely affect the Group's business, financial condition, results of operations or prospects.

2.6. Production risk

Sakret Group operates 4 production plants in Riga (Latvia), Kedainai (Lithuania) and Paide (Estonia), thus any technological issues, human errors, incorrect planning or other issues directly connected with production processes might result in stoppage of production output of plants, which will negatively affect the financial results of the Sakret Group.

Group is operating its production plants since 2004 and its employees have an extensive experience in managing production processes, thus any potential production risks are monitored and controlled.

2.7. Relations with key customers

Over the past years, the Issuer has maintained a moderate concentration among its customer base. Top3 clients of the Issuer generate 39% of company's revenue as of 2018 and Top5 clients generate 60% of company's revenue, and this concentration has been stable over recent years. The remainder of Issuer's clients contribute less than 10% to revenue each. Sakret Group's clients are all the largest DIY chains in the Baltics, therefore, the concentration is directly linked with DIY market concentration. The loss of any of key customers and Issuer's inability to find adequate alternative customers on a timely basis, or at all, on commercially acceptable terms, could have a material adverse effect on its business, financial condition and results of operations.

2.8. Credit risk of clients

Issuer's customers have a period of time, generally 45 to 90 days after the date of invoice, depending on the type of customer, in which to effect payment. As a result, Issuer is subject to the risk that its customers will not pay or will delay the payment for the products they purchased. This credit exposure risk may increase due to liquidity or solvency issues experienced by Issuer's customers, for example, as a result of an economic downturn or an adverse change in their business. If Issuer is unable to collect payment for amounts invoiced from its customers, it could have a material adverse effect on its business, financial condition and results of operations.

Issuer assigns credit to customers according to internal credit policy, which is developed, applying thorough internal analysis of Issuer's customers and seeking to diversify and limit its credit risk exposure.

2.9. Financial risk

Historically, Sakret Group made expansion investments co-financed by Luminor (then DNB bank), including loans for construction of the factories in Lithuania (total investment EUR 9.50 million) and Estonia (total investment EUR 6.70 million). Because of the financial crisis of 2008-2009 and geopolitical tensions with Russia, Sakret's core markets contracted and return on the loans was negatively affected. In 2013, a restructuring was done, forming a holding structure and renegotiating the repayment schedule, Sakret returned to positive cashflow.

After the merger of DNB and Nordea, Luminor revaluated its existing strategy and has decided to accept refinancing of Sakret Group loan at a discount – the current repayment schedule still is too long for the bank and the internal procedures do not allow to write-off part of the loan and keep Sakret as a client.

Due to the discount granted by Luminor, the consolidated equity of the Sakret Group will increase. Together with the shareholders contribution in amount of EUR 1m, the consolidated equity will become positive, allowing Sakret Group to participate in several grant and energy-efficiency increase programs and positively affecting the financial standing and solvency of the Issuer.

After the refinancing of Luminor loan, BlueOrange Bank will provide EUR 4 million long-term loan, EUR 2 million overdraft facility, EUR 1.7 million credit line and EUR 3.8 million will be raised via Notes Issue.

Despite the Issuer's track record with credit institutions, there is a possibility that sources of financing may not be available in the amount required for the Issuer, or their conditions may be too unfavorable, which may significantly affect Issuer's ability to ensure sufficient financing for the company's growth.

2.10. Refinancing risk

Principal of Notes will be repaid as a lump sum at maturity date, therefore the Issuer has increased refinancing risk. The Issuer will seek to refinance Notes issue or look for other funding sources in order to decrease refinancing risk, but if Notes will not be refinanced before maturity date, as per the management estimates, the Issuer should be able to cover principal of Notes from Group's own cash flow. In case of additional capital investments would be required during the duration of Notes, which would decrease cash available for repayment of Notes at the maturity, Issuer plans to refinance part of the Notes lump sum using long-term liabilities, which will be significantly decreased by 2022, based on the repayment schedule.

2.11. Dependence on future employees

In the future, the Issuer's activities will be affected by its ability to attract, preserve, and motivate highly qualified and experienced personnel. There is competition for personnel with the relevant skills and experience in Baltic countries and it is comparatively high; however, the Issuer has successful experience in the field of personnel management, offering education, professional growth, and development possibilities, as well as different motivation programs to the employees.

As of 2018, the Issuer's total number of employees was 132 persons. The majority of workers are involved in manufacturing processes.

2.12. Operational risks

Operational risk is a possibility of experiencing losses due to insufficient or unsuccessful inner processes, personnel management, systems, or external circumstances. As of 2018, the number of Group's employees reached 132 persons; therefore, thorough personnel selection is carried out, accurate descriptions of job duties are compiled, division of duties is coordinated, constant investments are made within the IT system, which allows the Issuer to reduce operational risks.

2.13. Legal proceeding and risk of other claims

The Issuer may be adversely affected by contractual claims, complaints and legal proceedings arising from relationships with partners, customers, competitors or regulatory authorities, as well as negative publicity such proceedings might cause. Any such legal proceedings, complaints, contractual claims or negative publicity may materially affect the operational activities, financial situation and business results of the Issuer.

2.14. Risks related to Notes

2.14.1. Collateral risk

Notes will be secured with Collaterals that will be subject to ranking described in Annex 5.

Noteholders should be aware that since the Estonian subsidiary of the Issuer is giving upstream collaterals, such collaterals could be contested under Estonian law in a certain case. As per the provisions of Estonian Commercial Code, an OÜ (osaühing)-type company shall not amongst others guarantee a loan taken by its shareholder whose share represents more than 5 per cent of its share capital. However, the Estonian law stipulates that this prohibition does not apply to guaranteeing or securing a loan taken by the parent if grant of guarantee or security/collateral does not harm the financial status of the company or the interests of its creditors.

If the Issuer fails to make the Coupon and / or Nominal payments in a timely manner, the Collateral Agent, acting in the interest of the Noteholders, will commence the Collateral enforcement proceedings according to the procedures described in Section 5.4. of the Terms of the Issue.

2.14.2. Notes repayment risk

Notes will be secured with Collaterals established in accordance with the Collateral Agreements executed between the Collateral Providers and the Collateral Agent. In case of Issuer's insolvency, Noteholders have the same right to receive their investment as other creditors of the relevant group in accordance with applicable regulatory enactments.

2.14.3. Notes early repayment risk

Issuer has a call option, which means, that at certain dates during the term of Notes the Issuer may decide to execute an early repayment of Notes by paying back the principal at the certain price for the Nominal amount to

the Noteholders. Noteholders should take into account that Notes early redemption price may be lower than Notes price on the secondary market.

2.14.4. Delisting risk

After Notes registration the Issuer plans to request admission to trading of the Notes on First North, which is alternative market operated by Nasdaq Riga. There is a risk, that Nasdaq Riga would not accept Notes to be admitted for trading on First North or order to delist Notes from the First North before the maturity after the admission to trading took place, due to changes in FCMC opinion and Legal acts, including Nasdaq Riga regulations.

2.14.5. Liquidity risk

Neither the Issuer, nor any other person guarantees the minimum liquidity of Notes. Noteholders should take into account that there may be difficulties in selling Notes in the secondary market.

2.14.6. Price risk

Notes will be repaid for their Nominal Value at the maturity, yet the price in the secondary market may change significantly. Neither the Issuer, nor any other person undertakes to maintain a certain price level of Notes.

2.14.7. Tax risk

Tax rates and tax payment procedure applicable at the moment of purchase of Notes to the tax residents, non-residents of Latvia, and residents of other countries may change. The Issuer will not compensate for the increase in taxes to Noteholders, therefore Noteholders may receive smaller payments related to Notes.
